Lily,

In regards to Dan's question about EPA comments and RTCs, I noticed that the Navy includes those in an appendix now, for current documents, but in the past they didn't and I'm not sure when that started. As I indicated in an earlier email, sometimes RTCs were addressed in a BCT meeting with no written RTC. I think you will need to go back to the Navy to request EPA comments if you need them. I've requested from Danielle meeting minutes from 2005 that may have address the Basewide Rad work plan.

Nina

Subject: Hunters Point info request

Hi Lily,

The Hunters Point documents we have been reviewing indicate a remediation level for radium-226 of 1 pCi/g above background, not to exceed 2 pCi/g, "per agreement with EPA." Could you send me documentation of that EPA agreement and its basis, and any risk assessment that was performed at the time of the risk associated with that level of radium? Also, I am having trouble locating the value being employed for radium background—could you let me know what value is being used and where I can find the source for it?

Additionally, I have not been able to locate anything in the links you sent me for the 5-Year reviews regarding EPA review of those reviews as to compliance with EPA CERCLA guidance for radionuclides, including consideration of changes to EPA PRGs. Could you direct me to such review if it took place?

Lastly, during our call last week Derek Robinson from the Navy offered to provide additional information on request. On the 13th I emailed him regarding questions and documents about the Tetra Tech matter. I haven't heard back. Given the upcoming meeting on Thursday, I very much would like to have that

information now. If there is anything you can do to help facilitate getting a response from the Navy, I would appreciate it.

Thank you for your help.

Daniel Hirsch
